## Abstract

	An interchangeable table top arrangement has a frame and backer board that
	can fit over a pre-existing table top or can be attached to a pedestal and used as a
	main table top. The frame and backer board define a recess, and an
	interchangeable insert fits into this recess. A hook-and-eye material (i.e., Velcro®)
4	or other suitable releasable attachment system hold the insert in place within the
7	frame. Finger holes in the backer board facilitate separating the attachment system
	to change out the insert. The inserts may have designs imprinted on them, e.g.,
	advertising, holiday theme material, or game boards.
